PROFESSIONAL SUMMARY

IT professional with 25+ years of hands-on experience across systems administration, networking, endpoint support, cloud services, identity management, enterprise troubleshooting, cybersecurity, and secure infrastructure operations. Currently pursuing Computer and Electrical Engineering at Oregon State University, with a long-term focus on quantum computing, high-performance computing, secure systems, cloud infrastructure, and next-generation computing architectures.

CORE TECHNICAL SKILLS

- **Systems & Infrastructure:** Windows Server, Linux, macOS, imaging, endpoint support, hardware, lifecycle support
- **Cloud & Identity:** Microsoft Azure, Microsoft 365, Entra ID, Intune, identity and device management
- **Networking:** TCP/IP, DNS, DHCP, VPN, Cisco, Meraki, switching, routing, wireless, troubleshooting
- **Security:** Endpoint security, BitLocker, hardening, vulnerability remediation, compliance-aware operations
- **Automation & Software:** PowerShell, Bash, Python, JavaScript, Git, GitHub, scripting, documentation
- **Advanced Computing Direction:** Quantum computing, high-performance computing, distributed systems, engineering mathematics

PROFESSIONAL EXPERIENCE

Junior IT Administrator - Copper River Shared Services / ReconCraft

- Support enterprise IT operations, endpoint management, infrastructure services, user support, documentation, asset tracking, and secure technical environments.
- Work with Windows systems, application installation and configuration, Microsoft cloud services, identity support, printers, peripherals, and compliance-focused IT processes.

IT Field Engineer - Hemmersbach US LLC

- Delivered on-site technical support, hardware troubleshooting, system deployments, enterprise service work, and customer-facing issue resolution across distributed environments.
- Managed complex field issues requiring ownership, communication, escalation discipline, and practical troubleshooting under time-sensitive conditions.

IT Consultant / Senior Field Technician / Systems and Support Roles

- Built a long-term technical foundation across systems administration, desktop support, networking, servers, email migrations, backup and recovery, virtualization, hardware, software, and user support.
- Supported business-critical infrastructure and end users across multiple environments while developing strong troubleshooting, documentation, and customer-service practices.

EDUCATION

- Oregon State University - Computer and Electrical Engineering; continued coursework in mathematics, programming, engineering design, and advanced computing.
- Prior degrees: AAS Computer & Networking Technology; BAS Information Technology - Pioneer Pacific College.
- Software engineering training: Coding Temple and freeCodeCamp.

CERTIFICATIONS

CompTIA A+ | Network+ | Security+ | Linux+ | Server+ | Cisco CCNA | Microsoft MCP | MCSA | MCSE | MCITP | VMware VCP

SELECTED PORTFOLIO DIRECTION

- Engineering portfolio: OSU-hosted webpage for coursework, labs, GitHub projects, cloud and systems documentation, networking/security projects, and quantum-computing learning artifacts.
- Career direction: advanced infrastructure, secure systems, cloud engineering, high-performance computing, quantum computing, automation, and engineering leadership.
